

# Casualties of the War in Iraq

Updated May 3, 2005 - This database contains casualty information for members of all coalition forces. Names of service members who have died are entered only after their official release by the military. Since names are not always released immediately, the number of names in the database may not correspond to overall numbers of deaths reported by military authorities. Information on captured or missing service members has been obtained from the military or directly from the members' families. The database does not include injured service members because comprehensive information on them is not available.
